

NAME:

## **George Washington's Teeth: Subtraction**

George only has ten teeth when he returns home during the war. He eats a nut and another one comes out. How many teeth does he have left?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

George has seven teeth left at Valley Forge. When he comes home, he loses two. After that, the dentist came and George lost another three. How many teeth does he have left?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$
